KEY SKILLS

- Implemented features for various applications in Java.
- Spring boot with Rest Services and GTM (Google Tag Manager)
- ELK (Elastic , Logstash and Kibana)
- Microservice with Kubernetes, Docker and Rancher
- Proficient in design, data structures, problem-solving, and debugging
- Known for writing efficient, maintainable, and reusable code
- Expert in the interaction between various devices and versions of Java
- SOAP Service, JAXB Context, Core Java, Flutter
- Maven and Angular
- Http Service, Oracle and Hibernate
- Graphs and Charts
- Java Architecture Components, Multithreading
- Efficient cross-platform development skills
- Awareness over Fragmentations, Java Development Life Cycle, Analytical skills, Solid experience in Backend Development
- SVN , Unix and GIT
- HTML5, CSS3, JSON, Jenkins
- Automated Build tools and Continuous Integration
- Jira tracking management

WORK HISTORY

Colt Technology Services, Senior Java Developer [Sept 2018- Current]

- Worked as senior software engineer working on java applications for Technology Domain, billing pos application and adding new features.
- Designed and built advanced applications for Web platform, and collaborated with cross functional teams to define, design, and launch new features.
- Wrote python script for critical application issues such as crashes, memory leaks, and concurrency problems.
- Used SVN as version control system, Jenkins for CI/CD pipeline and Rancher to manager Kubernetes Cluster.
- Implemented GTM (Google Tag Manager) on web application
- Providing guidance and recommendations about standard Java practices.
- Implemented ELK Stack to fetch logs from database and logs file
- Participate in fast-paced development cycles, have completed 100% of deadlines ahead of schedule.
- Contribute and participate in new feature product specifications.

Bureau Veritas, Senior Java Developer [Oct 2016 –Sept 2018]

- Worked on Inspection and Billing pos application with SOAP and Rest Service.
- Used restful web services and parsed JSON data.
- Made online web application for Inspection and Rules for Inspector.
- Made multi- threaded java applications for Bureau Veritas.
- Designed and handled requirements with code specification.
- Implemented java code for all java-based code.
- Designed database structure for hierarchical data model within relational database.
- Built data filters and app intelligence to provide a solid Backend.
- Provided feature for application to import/export delimited data.
- Developed and integrated analytics API's for progress, KPI of project.
- Took care of code review, code fixes and bug fixes.

DXC Technology, Java Developer [Oct 2015 –Oct 2016]

- Worked on SOAP Services in Insurance Domain
- Implemented SOAP Service Project from scratch
- Used MongoDB for Data Storage
- Used Singleton Design Pattern for JAXB Context

SIDE PROJECTS

Carona Tracker| github

- Angular application to fetch Carona Cases from news website and show it in graphical way.
- Used Map to Show with coordinates of cities against cases

EDUCATION

- Bachelor of Computer Science. Uttar Pradesh University, UP (INDIA).
- Java SCJP Certified Programmer
- ISQTB Certified Tester
